SQL (PostgreSQL) • AWS (S3)

NoSQL (MongoDB) • Prisma

Mongoose • Framer-Motion

Puppeteer • VITE • NPM • GIT

VSC • Multer

Profile

As an aspiring Junior Full Stack developer, I bring a solid foundation in **web application development** with experience in Next.js, which has given me a strong understanding of the field. Currently, I develop web-applications with the newest **Next.js** and TailwindCSS, but I am constantly striving to expand my skill set and keep up with the latest technologies, including **Figma**, **Svelte**, and WebSockets, which I am eager to learn. As a former professional CS:GO player, I understand what does it mean to be a team-player. With a strong work ethic and a passion for problem-solving, I am confident that I can make a valuable contribution to any team.

Projects

TanieZarcie, taniezarcie.vercel.app

2023/03 – 2023/05

Web-app for making people's lives easier when it comes to picking the right food in McDonald. Compare all of the items from menu, see the ranks and just look at the sets inside of the beautiful carousel. Don't know what to order? Just draw your next food. Built with Typescript, Next.js 13, Prisma ORM and pure CSS. Uses PostgreSQL hosted on AWS, and GIT for version control.

FragFeed, fragfeed.lm.r.appspot.com

2023/02 – 2023/03

Web-site which make it easier to follow all of the dramas and events from the esports scene. Check all of the hottest feeds from last week, create an account, and share your own posts! Built with Vanilla Javascript, Express, Mongoose and SCSS. Uses AWS S3, Google Cloud Platform as a hosting and MongoDB hosted on Mongo Atlas.

Personal Website, michalsilski.vercel.app

2023/05 – 2023/05

Personal Website to help people reach me out easier. Feel free to leave me a message here. Built with Typescript, Next.js 13 and Tailwind CSS.
