Skills

English (B2)

Backend — REST API, C#, .NET, .NET Core, Entity Framework Core, OpenAPI & Swagger documentation, API Versioning, Hangfire, SignalR

Frontend — JavaScript, TypeScript, HTML/CSS, Vue 2/3, Nuxt 2/3, Vuetify, Pinia, i18n, TailwindCSS

Mobile / React — React, React Native (Expo), Redux Toolkit, Tamagui

Databases — SQL Server, PostgreSQL, Redis

DevOps — CI/CD *(Azure DevOps Pipelines)*, IaC *(Bicep)*, Docker, Docker Compose, Nginx, Linux, Bash, YAML, PowerShell, VPS Administration

Cloud — Microsoft Azure (App Configuration, Key Vault, SQL, Storage, Azure Monitor, Application Insights, Communication Services, AI Content Safety), Firebase Cloud Messaging

Messaging & Real-Time — RabbitMQ, WebSockets

Authentication & Authorization — JWT, OAuth 2.0, OpenID Connect, Session-based authentication

AI-Assisted Development — Copilots, Agents, LLMs

Low Code — Amodit

Tools — Git, GitHub, NPM/PNPM/Yarn, Visual Studio, VS Code

About Me

Full-stack developer specializing in **.NET** backend and modern JavaScript frameworks **(Vue / Nuxt / React Native)**. Experienced in building business applications, mobile apps, and cloud infrastructure. Currently expanding my expertise in cloud and scalable backend architectures. Former professional esports player with strong teamwork and competitive mindset.

Professional Experience

Independent Full-Stack / Mobile Developer

11.2025 – obecnie

- Developing cross-platform mobile applications using React Native (Expo) with .NET Core backend
- Implementing authentication and authorization (JWT, refresh tokens, OAuth2/OIDC social login)
- Designing REST APIs, background jobs (Hangfire), and push/real-time features
- Managing Azure cloud infrastructure using Infrastructure as Code (Bicep) and containerized deployments (Docker, Nginx, CI/CD in Azure DevOps)

Junior Fullstack Developer, *Vectio sp. z o.o.*

10.2023 – 05.2025 | Warsaw

- Developed and deployed business applications across the full lifecycle
- Built backend services using ASP.NET Core, Entity Framework Core, REST APIs, and SQL Server
- Implemented authentication and authorization with JWT and .NET Core Identity
- Integrated applications with external systems including ZohoCRM, Subiekt, and Shopware
- Built multilingual frontend interfaces using Nuxt 3 / Vue 3 with TypeScript
- Implemented real-time communication features using WebSockets / SignalR
- Developed background jobs and asynchronous processing using Hangfire and RabbitMQ

Client assignment: Arval (BNP Paribas Group)

- Contributed to development and customization of the Amodit low-code platform, adapting workflows and solutions to enterprise business processes

Professional Esports Player, *CS:GO, Valorant*

06.2018 – 01.2021

Education

Bachelor of Engineering in Computer Science, *WSB Merito*

10.2021 – 03.2025 | Warsaw

Specialization: Front-end Development

Projects

MeetFinder — Social discovery mobile app (closed beta) , *meetfinder.pl*

- Location-based discovery of nearby users
- Rich Real-time features (matchmaking, chat, games) using WebSockets / SignalRc
- Push notifications for activity and matches

RateMyLook — Social photo rating platform (closed beta) , *ratemylook.pl*

- Platform for sharing photos and receiving community ratings
- AI-based content moderation using Azure AI Content Safety & Background processing for moderation and notifications
- Implemented tier-based access to features and analytics dashboards (Free / Premium)
- Performance-optimized stats dashboard and leaderboards
